visit ALZConnected®.

Build a support system with
people who understand.

This Alzheimer’s Association support group is for care partners following the death of a loved one. Often, care partners express that they have grieved the loss of their loved one twice. The initial grief may begin while a loved one is living with dementia, and is experienced again with the loss of the loved one. This support group is to help provide bereaved care partners with an atmosphere to explore feelings, emotions, and needs.
